

- Fit an Approved Filter - if you are considering fitting a filter, we advise that you contact at least three approved suppliers to ensure you get competitively priced solutions for your vehicles. Approved suppliers are listed on the website at www.tfl.gov.uk/lezlondon;
- Upgrade your vehicle - you may choose to upgrade to a new (or newer) model that does meet LEZ standards;
- Reorganise your fleet - if you operate a fleet of vehicles, you could reorganise it so that only vehicles meeting the LEZ standards are driven within the zone;
- Rent a vehicle – if you have a short-term need or plan to drive in the zone very infrequently you may consider renting a vehicle that meets the LEZ standards; or
- Pay the daily charge - you can pay a daily charge to drive a vehicle that does not meet the LEZ standards inside the zone. The daily charge for lorries, buses and coaches is £200 and £100 for vans and minibuses.

The Mayor recognises that the LEZ means additional cost and has already delayed the inclusion of vans and minibuses by 15 months to give people more time to prepare. The Mayor has also negotiated discounts on new vans and minibuses from Ashwoods, Citroen, Ford, Mercedes-Benz, Peugeot, and Volkswagen. Please visit www.tfl.gov.uk/lezlondon and click on the 'Replace a vehicle' link for details. We are also aware that some filter manufacturers are offering discounts too.

Most vehicles driving in London already meet the standards but we need to encourage those remaining to do the same. We would encourage you to take any necessary action early as some options take several months to complete.

Please do not hesitate to contact us for further information: email lez@tfl.gov.uk or call Miss Rumiya Uddin (Tel: 020 3054 1539). Alternatively, visit the website at www.tfl.gov.uk/lezlondon.

We hope that you find this information useful.

Yours sincerely
